11. The tenderers are requested to make themselves fully conversant with the job requirement and technical specification and general conditions of the contract as per Form 'A' of UPPCL.
12. The contractor shall be responsible for any damage loss and breakage during delivery the material.
13. For any further Clarification, tenderers can contact to the Superintending Engineer, Electricity Workshop Circle, Meerut. No subsequent representation of ground of any sort of misunderstanding will be entertained.
14. In the event of unsatisfactory performance/quality of material as may be determined by the Superintending Engineer, Electricity Workshop Circle, Meerut. The agreement/Purchase Order will be terminated without any notice and security amount / earnest money will be forfeited.
15. Only such firms who are themselves manufacturers and authorized representative of manufacturers and are executing such jobs need tender. They will be required to produce satisfactory evidence that they have necessary resources and organization to undertake such work to the satisfaction of the purchaser.
16. Purchase Order will be sent by the department to the successful tenderer as per General Condition of contract Form 'A' of UPPCL. All the documents submitted in connection with the tender shall also form part of contract.
17. However, if there is tolerance on negative side within the permissible limit of the specified standard, and it does not make any difference in the performance of the material to be decided purchaser only the proportionate reduction in prices shall be done by the consignee.

18. Payment shall be made after receipt and satisfactory checking of material at site as per conditions of Form 'A'. No interest shall be paid for delayed payments, whatsoever the delay may be.

19. **INSPECTION & TESTING:**

Inspection and testing of material shall be done by Chief Engineer (DQC)/ S.E(DQC), P.V.V.N.L, Meerut Team for which intimation will have to be given by the firm at least 10 days before from the stipulated delivery period. The inspection of the material shall be done at the Premises of Firm's Works (if Contractor is a Manufacturing Firm of above ordered item and should have all NABL calibrated testing Equipments and facility, As per provision of relevant IS for Acceptance Test as Stipulated in IS, which is required for testing of above material) or if Contractor is an Accredited Representative of manufactures of above item(if firm is not itself manufacturer of ordered items), Then in such cases material inspection will held on the Manufacturing firm's premises of which Tendering Firm has enclosed Accredited Representative certificate of this manufacturing firm should have all NABL calibrated testing Equipments and facility, As per provision of relevant IS for caring out Acceptance Test as Stipulated in IS, which is required for testing and acceptance of above material. Test Certificate of manufacturer shall be produced at the time of inspection. Further firm has to produce/attached all test reports of relevant test of above material done during the manufacturing process and produce it at the time of inspection to the inspecting team. Inspection and testing shall be done as per Clause 2.7 of General Requirement of Specification and Clause-14 of the General Conditions of Contract Form 'B'. In addition to the terms and conditions mentioned in these clauses, following Terms & Conditions are also added:-

- 1.1 The Inspection team shall conduct the inspection/testing as per TS/GTP confirming the relevant IS. Supplier shall also render necessary assistance to the Inspecting Officers in making random sampling whenever considered necessary.
- 1.2 The Inspection team shall ensure the packing and marking of offered material as per TS/GTP in their presence.
- 1.3 The Inspection team shall ensure the sealing of offered material after inspection/testing in their presence. The material shall be duly marked, packed or sealed as considered necessary by the Inspecting Officer after inspection has been carried out and the material approved for dispatch.
- 1.4 The firm has to strictly abide by the guideline laid down regarding packing and marking of material as is provision of TS of this tender as well as of relevant IS before offering the inspection of finished product to S.E, EWC, Meerut. In case of any discrepancy found by inspecting authority during inspection or at the time of receipt of inspecting material the material shall be rejected and futile journey charges as per terms condition shall be imposed on the firm. In case of any discrepancy found in material quality, packing and marking at the time of receipt of material, the material shall be rejected and the firm shall offer inspection of material in place of rejected material. On repetition of such activity the firm may be blacklisted/debarred.
- 1.5 Notwithstanding the inspection carried out by the Officers of PVVNL, or their authorized representative, the firm shall be responsible to ensure correct supply of material at the destination both in terms of quantity as well as quality as per order.
- 1.6 No material shall be dispatched without inspection and testing by the representative of Superintending Engineer (DQC), PVVNL, Meerut. Testing charges, if any shall be borne by the supplier.

20. **FUTILE JOURNEY CHARGES:** In case on receipt of inspection call from the firm after LOI/Purchase Order the material is not found Ready or not as per GTP/Drawing/Technical Specification and relevant IS by the inspection team of PVVNL at the works of firm/ manufacturer, the penal charges for such futile journeys shall be levied as per following:

1. Location of firms works upto a distance of 1000 Kms. from PVVNL headquarter-Meerut - Rs. 35,000.00
2. Location of firms works above distance of 1000 Kms. from PVVNL headquarter-Meerut. - Rs. 40,000.00

The re-inspection call shall be entertained only after submission of futile journey charges by the firm in the form of demand draft in the name of Managing Director, PVVNL-Meerut and payable at Meerut. The firm shall be responsible for delay in supply of material due to futile journey as above. The futile

journey charges shall be allowed maximum two times. In case of failure in inspection twice, the action against the firm shall be taken as per rules.

- 21. SAMPLE TESTING:** Purchaser, on his discretion, may send any randomly selected sample from the supplied lot for any/all testing as per technical specification / ISS in any of the NABL accredited lab. The results of such tests shall be final and binding on both the purchaser & supplier. The cost of such test (s) shall initially be borne by the purchaser and in case the material is found not conforming to desired specification, the above cost shall be re-covered from the supplier. In addition to this the following penal action shall also be taken by the purchaser.
- (a) The order for the remaining supplies against the said contract shall be cancelled and in such cases payment of such failed quantity of material will not be done by payment Authority.
 - (b) The supplier will be blacklisted/debarred from participating in tenders for at least 3 Years from the date of tests result into failure of supplied materials.

ANNEXURE-IX

TECHNICAL SPECIFICATION, QUANTITY AND RATE SCHEDULE AGAINST

Short Term: E- T.No. 39/E. Workshop C./MRT/2024-25

S. No	Description of Material	Unit	Qty.
1	Supply Heavy Duty Hydraulic Trolley suitable for handling of distribution transformers all specification as per enclosed GTP.	Nos.	36
2	Supply of Foot operated shearing machine including blade set suitable for cutting of press board From 1mm thick up to 3mm thick, Size 1200mm as per specifications.	Nos.	5
3	Supply of Cubical shaped heating oven (Double Decker) outer frame made from MS sheet and all specification as per specifications.	Nos.	8

Terms:-

- 1- Rates quoted must be F.O.R. destination.
- 2- Validity of rates (Not less than **120** days)
- 3- Delivery Period as per order/L.O.I. in defined lots. Ist lot will be required to be delivered within one month from the date of order
- 4- After placement of purchase Order to successful Firm has to submit G.T.P and drawing of material as per above specification & IS with full details shall be submitted by firm to this office for approval, within 7 days from issue of this Purchase Order. Firm has to submit G.T.P & complete Engineering Drg. (to be Developed as per sample) of ordered items to SE, EWC, Meerut for its approval within 7 days from issue of the Purchase Order.
- 5- Regarding element of GST, it must be clearly mentioned in the offer (Price Bid) otherwise GST will be considered as included in the given rates for the purpose of comparison of rates.

Guaranteed Technical Particulars of

(HYDRAULIC HANDLIFT PALLET TRUCKS FOR HANDLING OF TRANSFORMERS)

- **Product Description:** This hydraulic trolley will be used for lifting, moving and stacking damaged and repaired transformers from one place to another in various workshops under PVVNL. It should be efficient to work on a uniform and non-uniform surface. There will be stacking of minimum 25 to 30 transformers per day in each workshop through trolley.
- **Features & Technical Specification:-**

1. Load Capacity	: 2500 kg
2. Lift	: 100 mm
3. Overall Width	: 865 mm
4. Fork Width	: 490 mm
5. Fork Length	: 1220 mm
6. Both Leg Width	: 187 mm
7. Front Wheels 2 Nos.(CAST IRON)	: 200X50 MM
8. Rear Wheels 4 Nos.	: 68 MM
9. Minimum. Pallet Gap	: 68 MM \pm 2 mm (Not Accepted more than 70mm)
- **Other Specifications –**
 1. This Hydraulic units should be leak proof and with special wear resistant seals, instead of rubber which wears out very fast.
 2. Should have Special wiper seals are provided on the Ram & plunger to avoid ingress of dust & dirt into the Hydraulic system
 3. The ram & Plunger are ground & HARD CHROME plated to avoid friction & rusting particularly while working out doo Al wear points are provided with Bushes and Lubrication parts are fitted with grease nipples.
 4. The ram & Plunger are ground & HARD CHROME plated to avoid friction & rusting particularly while working out doo Al wear points are provided with Bushes and Lubrication parts are fitted with grease nipples.
 5. All the pins fitted should be hard & grinded.
 6. All wheels should be of Cast Iron metal.
 7. Trolley should have a Release system by a foot pedal.

Guaranteed Technical Particulars of
(1200 MM Shearing Machine made of mild steel for Cutting Press Board)

Body Material - Mild Steel

Operation Type – Foot Operated Manual.

Weight of the machine - 430kg approx.

Blade quality - HCHCr (high carbon high chromium) d3

Blade thickness - 14.5mm

Machine can cut up to - 1.2mm-1.5mm M.S and 0.8mm- 1mm S.S and 5-6 mm press board.

Guaranteed Technical Particulars of

(Heating Chamber Outer SIZE 3000(H) X 3000(L) X 2400(W) 27 kw (OVEN) with Double Decker Trolley confirming to ISO 9001:2008)

- Outer body of heating chamber made of heavy-duty MS Sheet 3 mm thickness.
- Inner body of Heating Chamber made of heavy-duty MS CRCA Sheet of 1.6 mm thickness.
- Heating Chamber body frame fabricated of MS Channel of 100 x 50 x 6 mm thickness.
- Hinged type double front door is provided of M.S Channel 100 x 50 x 6 mm frame sheet outer and inner walls of heavy-duty M.S Sheet. The edge of the door is fitted with asbestos tape and insulated with Glass\Minerals wool non- hygroscopic K-factor to no loss temperature. The gap between the door and the flooring will permit easy opening & closing of the door & will be sealed by durable flexible flap to prevent leakage of air. The gap between the doors and the walls measured before fitting the asbestos seals will not exceed 3-4 mm at any point.
- For sealing in the door flat type asbestos is provided inside the grooves /edge of the door for effective heat seal.
- The base of Heating Chamber will be fabricated with 3 mm thick MS sheet with 100 mm insulation

Insulation:

Insulation between walls filled with 100 mm standard quality glass/ Mineral wools non hygroscopic, K-factor for no loss temperature.

In Double Decker Size of 1st Trolley:

- Depth : (2700 mm) approx.
- Width : (1740 mm) approx.
- Height : (200 mm)approx

In Double Decker Size of 2nd upper Trolley:

- Depth : (2650 mm) approx
- Width : (2000 mm) approx
- Height : (1400 mm) approx.

The size of the Trolley is as above given will be supplied having Double Decker System with the provision of Four side M.S Pillar as the leg & frame height 1400 mm. The Trolley will be out of suitable size of M.S Channel of 100 x 50 mm fix in the trolley as the top of the plate form with double support mounted of 5 mm thick sheet with welding & smooth finish for a load of 3 MT Capacity. Suitable design MS Plate supported by 2 pairs of wheels with bearing, moving on track supports laid in the bottom floor with extension on door side for full discharge. Rail track will be made of MS Bar 04 nos. of size 25 mm with 14 ft. long.

The complete trolley will be painted with two coats of Red – oxide primer and then with two coats of heat resistive Aluminum Paint outside ISI Mark as per relevant both inside & outside. All Mild steel materials shall be of quality as per relevant IS.

Temperature Range:

Heating Chamber Temperature is controlled by Microprocessor based ISO- 9001-2008 certified Digital Temperature Controller cum Indicator with Temperature range from above ambient to 150 deg. C. having LED display of Set value & Process value having accuracy of $0.25\% \pm 1^{\circ}\text{C}$. The Temperature of Heating Chamber is adjustable from above ambient to 5°C to 150°C . K Type Sensor with high accuracy is used with Temperature Controller.

Heaters & Motors:

Motor Crompton or equivalent make 3 HP, 3 phase, motor at back side of the chamber. (01 No.) Heaters 1.5 kW capacity tubular type 'U' shape heaters fitted in inner back side of Heating chamber with safety cover. (18 Nos.) Blower To uniform the temp. all Over the heating chamber a blower fan of 3 HP capacity.

Motor is provided for circulation of air inside the heating chamber to draw of fresh Air, expelling moisture and vapor. Motor Direct drive Turbine Type blower fitted on the back side of the heating chamber.

Blower is dynamically balanced. (01 No.) Exhaust Heating Chamber is provided with suitable exhaust arrangement on the both side system with manual damper arrangement for open / close operation, Adequate fresh air & Ventilation Entry is provided so that air exchange for the purpose of moisture removal is done effectively. Painting with phosphate heat proof Resistant Aluminum Paint.

Construction of Control Panel:

Control Panel will be fabricated with heavy duty MS Angle Frame with 20 gauge CRCA sheet duly epoxy powder coated of 450 mm (D) x 600 mm (W) 750 mm (H) size approx. and will be complete with one separate free floor mounted control panel with necessary components as mentioned below & wire marking with copper lugs used.:

It will be fitted with:

- ISO-9001-2008 certified Microprocessor based Digital Temperature Indicator cum Controller (Reputed Make) having LED display of Set value & Process value having accuracy of $\pm 2^{\circ}\text{C}$. with Temperature range from above ambient to 150°C .
- Analogue Hydraulic Capillary Type Thermostat (Reputed Make)
- Volt/ AMP/Frequency meter/ Digital type
- Current transformer CT Operated
- Magnetic Air Brake contactor (Reputed Make)
- Selector switch for blower operation ON/ OFF (reputed make)
- Sensor K- Type
- One ICTP Switch fuse unit
- Indicating lamps for: - LINE & LOAD
- MCB for: - LINE & LOAD
- All housed in an elegant sheet metal cabinet well-ventilated and nicely painted.

Safety Features:

- Necessary interlocking is provided between the blower and heater. Heater ON only when Blower ON. No any Separate provided to the heater switch ON.
- When Motor Overload trip then all system will also trip.
- 01 Temp. Controller is provided digital type thermostat.
- Emergency Push Button for Stop.
- Heater and Fan must stop when doors are open.
- Thermo Couple for Overload.

Power

To work on 415 volts \pm 10% three phases with proper earthing.
