# **THE ELECTRICITY (SUPPLY) ACT, 1948 (Act 54 of 1948) <sup>1</sup>**

An Act to provide for the rationalisation of the production and supply of electricity, and generally for taking measures conducive to <sup>2</sup>[Electrical development.]

**[10<sup>th</sup> September, 1948]**

Whereas it is expedient to provide for the rationalisation of the production and supply of electricity, for taking measures conducive to <sup>2</sup>[electrical development] and for all matters incidental thereto;

- 1. For Statement of Objects and Reasons see Gazette of India 1947, Pt. V. p. 514; and for Report of Select Committee. see ibid., 1948, pp. 201-03. The Act has been extended to Dadra and Nagar Haveli by Reg. 6 of 1963, Sec. 2 and Sch. I (w.e.f. 1<sup>st</sup> July 1965).**
- 2. Subs. by the A.O. 1950, for the words “the electrical development of the Provinces of India”**

It is hereby enacted as follows:-

The preamble makes it clear that the Act provides for-

- (i) Rationalization of production and supply of electricity;
- (ii) Taking measures conducive to electrical development; and
- (iii) Matters incidental thereto.

## **STATE OF OBJECTS AND REASONS**

“The coordinated development of electricity in India on a regional basis is a matter of increasingly urgent importance for post-war re-construction and development. The absence of coordinated system, in which generation is concentrated in the most efficient units and bulk supply of energy centralized under the direction and control of one authority is one of the factors that impedes the healthy and economical growth of electrical development in this country. Besides, it is becoming more and more

apparent that if the benefits of electricity are to be extended to semi-urban and rural areas in the most efficient and economical manner consistent with the needs of an entire region, the area of development must transcend the geographical limits of a municipality, a cantonment board or notified area committee, as the case may be. It has, therefore, become necessary that the appropriate Government should be vested with the necessary legislative powers to link together under one control electrical development in contiguous areas by the establishment of what is generally known as the 'Grid System'. In the circumstances of this country such a system need not necessarily involve inter-connection throughout the length and the breadth of a province; regional co-ordination inclusive of some measures of interconnection may be all that is needed. An essential pre-requisite is, however, the acquisition of necessary legislative power not only to facilitate the establishment of this system in newly licensed areas but also to control the operation of existing licensees so as to secure fully coordinated development.

Government feels that it is not possible to legislate for this purpose within the frame-work of the Indian Electricity Act, 1910, which was conceived for a very different purpose. In their view what is needed is specific legislation, on the broad lines of the Electricity (Supply) Act, 1926, in force in the United Kingdom, which will enable Provincial Governments to set up suitable organizations to work out 'Grid System' within the territorial limits of the Provinces. Although executive power under the proposed bill will necessarily vest in the provinces, two considerations indicate necessity for Central legislation-

- (i) The need for uniformity in the organization and development of the 'Grid System', and
- (ii) The necessity for the constitution of semi- autonomous bodies like Electricity Boards to administer the 'Grid System'. In the view of the Government it is bodies like these which are likely to be most suitable organisations for working the 'Grid Systems' on quasi-commercial lines. Such Board cannot, however, be set up by Provincial Governments under the existing Constitution Act as they would be in the nature of trading corporation within the meaning of entry 33 of the Federal Legislative List.”<sup>1</sup>

**1. Vide Statements of Objects and Reasons. Published in the Gazette of India, 1947, Pt.V, p. 514.**

## **STATEMENT OF OBJECTS AND REASON TO ACT 50 OF 1991. –**

1. Indian Electricity Act, 1910, deals with the supply and use of electrical energy and the rights and obligations of the licensees.

The Electricity (Supply) Act, 1948 deals with the statutory powers and functions of the Central Electricity Authority. State Electricity Boards and Generating Companies.

2. It is proposed to widen the scope of private sector participation in power generation, supply and distribution by suitably amending the aforesaid Acts. The main amendments are as follows:-
  - (a) Section 6 of The Indian Electricity Act, 1910, which deals with the period of licence is Sought to be amended to enhance the said period of licence to 30 years followed by subsequent extensions for 20 years at a time. This ensures reasonable stability in the operation of the licence.
  - (b) Section 2 of The Electricity (Supply) Act, 1948 (hereinafter referred to as the said Act), which defines various expressions, is proposed to be amended to give effect to certain changes in the definitions and also to define certain new expressions. Clause (4-A) is proposed to be substituted to remove the exclusion of private sector from the definition of "Generating Company", as it permits only the companies formed by the Central Government or by any State Government or jointly by the Central Government and one or more State Governments.
  - (c) Section 15-A of the said Act, which deals with the formation, objects, etc., of Generating Companies is proposed to be amended so as to provide for a establishment of Generating Companies in the private sector as well as in the joint sector.
  - (d) Section 29 of the said Act which deals with the submission of schemes involving capital expenditure exceeding rupees five crores to the Central Electricity Authority is proposed to be amended in the interest of flexibility, keeping in view the escalation in the cost of projects and to provide for revision from time to time of the prescribed limit of project cost requiring such clearance.
  - (e) A new Sec. 43-A is proposed to be inserted to the said Act to provide for the terms and conditions and tariff for sale of electricity by the Generating Companies.
  - (f) Section 55 of the said Act which provides for licensee companies with the Board's directions is proposed to be amended to ensure that the licensees as well as Generating Companies shall comply with the directions issued by the

designated coordinating agencies in the matter of generation and supply of power.

- (g) Paragraph XVII (10) (b) of Sch. VI to the said Act is proposed to be amended to raise the standard rate from the existing level of 2 per cent. over the Reserve Bank of India rate to 5 per cent. over the Reserve Bank of India rate to motivate investment in the power projects set up by licensees companies.

3. The Bill seeks to achieve the above objects.

## **PART II PRICE TO BE PAID FOR ELECTRICITY SUPPLIED BY THE BOARD UNDER PART I**

IX. IX. There shall be agreed between the Board and the licensee in respect of each month of the licensee's year of account-

(a) The maximum capacity of the station, that is to say, the maximum capacity (expressed in kilowatts available for supply to feeders) of such plant and works appertaining to the generation of electricity at the station as where available for reliable and regular commercial operation on the first day of the month, including the capacity of such plant and works as were temporarily out of commission;

(b) The number and size of units of plant works, forming part of the aforesaid plant and works, which ought properly to be deemed to be stand-by if the station were not a controlled station;

(c) The stand-by capacity of the station, that is to say, the number of kilowatts (expressed in kilowatts available for supply feeders) by which the maximum capacity of the

station would be reduced if the stand-by plant and works referred to in Cl. (b) were to be left out of account;

(d) The actual effective capacity of the station, that is to say, the number of kilowatts by which the maximum capacity exceeds the stand-by capacity.

X. (1) The licensee shall be entitled to purchase from the station in each month at a price determined under para. XIII a number of kilowatts not exceeding the scheduled effective capacity of the station on the first day of that month as determined in sub-para. (2).

(2) The scheduled effective capacity of the station shall be agreed between the Board and the licensee in respect of each month of the year of account, and shall be computed in the same manner as the actual effective capacity under para. IX, except that there shall be left out of account such units of plant and works, if any, forming part of the plant and works referred to in Cl. (a) of the said paragraph, as the licensee declares to be surplus to his requirements for the time being:

Provided that the licensee shall not declare to be surplus to his requirements any such units of plant or works as were installed or were an order at the date of control or which were included in any previous computation of the scheduled effective capacity:

Provided further that if as a result of the licensee declaring as surplus to his requirement any units of plant or works, the scheduled effective capacity is in respect of any month computed to be less than the maximum demand of the licensee on the station for the purposes of his own undertaking, then such units of plant or works and all further additional units of plant or works shall thereafter always be deemed to be surplus to the requirements of the licensee as aforesaid unless the Board decides otherwise.

XI. Of the kilowatt-hours purchased by the licensee from the Board in each month, a number of kilowatt-hours not exceeding the number which bears the same proportion to the total number purchased as the scheduled effective capacity for the month bears to the maximum demand of the licensee on the Board in that month shall be purchased at a price determined under para. XIII ; the balance being purchased at a price determined under para. XIV:

Provided that if the station is a hydro-electric station or if any unit of a combined station is a hydroelectric unit, the number of kilowatt-hours which the licensee shall be entitled to purchase as aforesaid shall be reduced by such amount, if any, as may be agreed between the Board and the licensee, having regard to the number of 'kilowatt-hours actually supplied in the month from such hydroelectric station or unit.

XII. As soon as practicable after the end of a year of account-

(a) There shall be ascertained in respect of that year the cost of production at the station in accordance with the provisions of the Eighth Schedule:

(b) There shall be deducted from the total sum ascertained, in respect of the year under Cls. (b), (c), ((l). (e) and (f) of para. I of the Eighth Schedule, such proportion of the charges referred to in the said clauses as are wholly attributable to so much of the plant and works, if any, as has been declared by the licensee under Sub-paragraph (2) of para. X to be surplus to his requirements, and the balance remaining after such deduction shall, for the purposes of this schedule. be referred to as the schedule overhead charges:

Provided that in assessing the said proportion, regard shall be had to the period during which any such plant or works were declared to be surplus as aforesaid;

(c) There shall be allocated between fixed costs and running costs in accordance with the provisions of the Ninth Schedule, the sum ascertained in respect of that year under Cl. (a) of para. I of the Eighth Schedule, and the amount of running costs divided by the number of kilowatt-hours supplied from the station in that year shall for the purposes of the Schedule, be referred to as the running charges component:

(d) There shall be ascertained in respect of that year an amount (in this Schedule referred to as the scheduled fixed works costs) calculated from the expression, A

$$\frac{A}{2} + \frac{A}{2} \times \frac{B}{C} \text{ where--}$$

A = the amount of fixed cost ascertained in respect of that year under Cl. (c);

B = the sum of the scheduled effective capacities for each month of that year;

C = the sum of the actual effective capacities for each month of that year.

XIII. The licensee shall pay to the Board in respect of each month of the year amount for the electricity purchased under paras. X and XI, -

- (a) In respect of kilowatts, an amount equal to one-twelfth of the sum of the scheduled over-head charges and the scheduled fixed works costs,
- (b) In respect of kilowatt-hours, a sum found by multiplying the number of kilowatt-hours supplied by the running charges component:

Provided that if in any year of account the station for any reason ceases to generate electricity for one thousand hours or more, then for the purposes of ascertaining the running charges component and the scheduled fixed works costs under Cls, (c) and (d), respectively of para. XII-

- (i) The said Cl. (c) shall be construed as if there were substituted for the words "that year-" in both places where they occur, the words "the most recent year of account in which the station did not cease to generate electricity for one thousand hours or more" and as if to the said clause the following proviso were added, namely:

"Provided that so much of the said sum as is represented by the cost of fuel shall be adjusted to take account of the cost which would have been incurred had that fuel been consumed at the average prices prevailing in the actual year of account.";

- (ii) In evaluating the expression contained in the said Cl. (d), the letter C shall be deemed to be equal to the sum of actual effective capacities for each month of the recent year of account in which the station did not cease to generate electricity for one thousand hours or more:

Provided further that if in any year of account there exist in the station any units of plant or works which have been declared by the licensee under sub- paragraph (2) of para. X to be surplus to his requirements in that year, there shall be added to the running charges component in respect of that year the amount, if any, by which that part of the said component attributable to the cost of fuel

is less than ninety per centum of the corresponding part of the running charges component in respect of the year of account immediately preceding that in which the earliest installed capacity of the said units of plant or works first came into commercial operation in the station and in ascertaining the corresponding part as aforesaid, the fuel consumed shall be deemed to be of the same average quantity and to be consumed at the same average cost per ton as the fuel consumed in the year of account:

Provided further that if in respect of any month of the year of account any units of plant or works previously declared by the licensee as aforesaid to be surplus to his requirements are for the first time taken into account in assessing the scheduled effective capacity for that month, then in addition to the payment referred to in Cl. (a) the licensee shall pay to the Board a sum equal to any sums previously paid by the Board to the licensee on revenue account (in respect of any period prior to the date on which the said units of plant or works came into commission) by way of interest depreciation testing and turning-up expenses attributable to the said units of plant or works; and the sum to be paid as aforesaid shall become due in one or more installments and at such time or times as the Board may direct.

- XIV. The price payable by the licensee to the Board for all electricity supplied by the Board to him in excess of quantities referred to in paras. X and XI and shall be the Grid Tariff.
- XV. The licensee shall have the right at any time, on giving to the Board prior notice in writing expiring at the end of any year of account, to purchase from the Board at the Grid Tariff the whole of the electricity supplied to him by the Board thereafter:-

Provided that the Board in those circumstances may make it a condition that the licensee shall, until the date on which the scheduled effective capacity of the station becomes nil, pay to the Board in respect of each month in addition to the Grid Tariff one-twelfth of such proportion as the Board may fix of the annual charges by way of interest and depreciation which would have been payable to the Board in respect of the year of account had the said notice not been given:-

Provided further that in assessing the scheduled effective capacity for the purposes of the first proviso all units of plant or works which may have been under this Schedule declared or deemed to be surplus to the requirements of the licensee at the date of expiration of the said notice and all additional units of plant or works shall after

that date always be deemed to be surplus to the requirements of the licensee:-

Provided further that after the expiration of the said notice the licensee shall not be entitled any time to purchase electricity from the Board at the price ascertained under Para. XIII.

### **PART III**

## **PERMANENT CLOSING DOWN OF A CONTROLLED STATION**

**PAYMENTS OUT OF THE CONTINGENCIES RESERVE.** -Payments out of the Contingencies Reserve can be made only with the State Government's approval. It is particularly noteworthy that the electricity company can make good from out of the contingencies Reserve even a loss of profit arising out of strikes, accidents and other circumstances over which it has no control. There can be no doubt, in the circumstances, that the monies in the contingencies Reserve belong to the electricity company<sup>1</sup>
